

Simplifying SEBI Compliance with CodeSign

The SEBI Mandates at a Glance

Key Requirements:

Data Security (PR.DS)

- Ensure the integrity of software, firmware, and critical systems, including connected systems.

Mobile Application Security (PR.AA):

- Prevent reverse engineering and tampering.
- Validate application signatures during runtime to ensure authenticity.

Challenges Faced by the Financial Institutions

01

Managing integrity across multiple systems.

02

Preventing tampering and reverse engineering of mobile apps.

03

Demonstrating compliance to regulators during audits.

04

Keeping operations secure and scalable in a dynamic threat landscape.

CodeSign's Alignment with SEBI Mandates

What CodeSign Does:

Integrity Validation

Automates code signing for software and firmware, ensuring cryptographic validation before deployment.

Runtime Security

Enables signature validation during application runtime to confirm authenticity.

Tamper Prevention

Embeds anti-reverse engineering and tamper-detection mechanisms in mobile apps.

Audit Readiness

Provides detailed logs and cryptographic proof of compliance, simplifying regulatory audits.

Benefits of Choosing CodeSign?

Regulatory Compliance Made Simple

Align seamlessly with SEBI's Cybersecurity and Cyber Resilience Framework (CSCRF).

Enhanced Security

Protect critical systems, firmware, and mobile applications against unauthorized modifications and cyber threats.

Operational Efficiency

Automate signing processes to reduce manual effort and accelerate software deployment timelines.

Customer Trust

Align seamlessly with SEBI's Cybersecurity and Cyber Resilience Framework (CSCRF).

Cost Savings

Reduce penalties and operational overheads associated with compliance and security risks.

Seamless Integration

Fits into existing DevSecOps workflows.

Scalable

Secures hundreds of applications across multiple teams.

Future-Ready

Protects against evolving threats with industry-leading security standards.

Achieve SEBI Compliance with Ease

Secure your systems, protect your customers, and simplify audits with CodeSign.
