

# Secure Compliance with CodeSign

## Why Code Signing Matters for Financial Institutions

Banking and financial institutions handle critical systems that demand the highest levels of integrity and security. The Securities and Exchange Board of India (SEBI) has mandated that financial

institutions, including Market Infrastructure Institutions (MIIs), implement mechanisms ensuring the integrity of software, firmware, and connected systems.

### The SEBI mandate highlights:

- **Verify software integrity:** Institutions must verify that software and firmware are authentic and unaltered before deployment.
- **Prevent tampering:** Robust security processes are essential to safeguard systems from unauthorized changes.
- **Trustworthy systems:** A focus on trustworthy operations to secure the entire financial ecosystem.

These guidelines set a precedent for broader financial compliance, ensuring all entities adopt

high-security standards to protect sensitive data and systems.

# What is CodeSign by Aujas?

CodeSign is an automated, end-to-end solution. It provides a scalable and secure method to validate the integrity of software, firmware, and application updates, ensuring compliance with regulatory requirements.

## Key Features:

Ensures software authenticity and prevents tampering.

Automates verification processes for faster deployment.

Integrates seamlessly into DevSecOps pipelines for operational efficiency.

## Who Should Use CodeSign?

CodeSign is ideal for financial institutions that:

Need to comply with SEBI's stringent guidelines.

Seek to minimize manual compliance efforts.

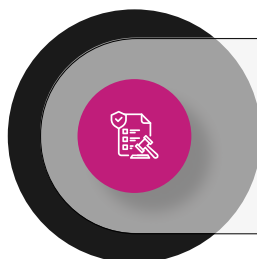

Want to safeguard critical applications and data.

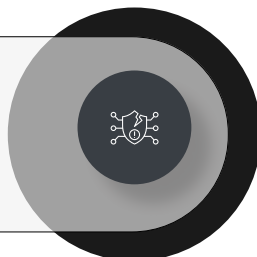

Aim to boost operational efficiency and cybersecurity resilience.

# How CodeSign Aligns with SEBI's Mandate

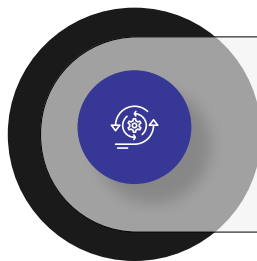

## Regulatory Compliance

CodeSign ensures alignment with SEBI's guidelines, helping institutions validate and protect software integrity across all critical systems.

## Mitigating Cyber Threats

Protects against unauthorized software updates and malicious code, addressing one of the core concerns outlined in the SEBI mandate.

## Streamlined Updates

Automates software validation and deployment, ensuring operational continuity without the risk of tampered updates.

## Key CodeSign Benefits

### Enhanced Security Posture

Safeguard against risks like unauthorized access, tampered software, or malicious updates.

### Increased Efficiency

Reduce manual intervention in compliance processes, cutting signing time by up to 70%

### Cost Savings

Avoid compliance-related penalties and operational overheads with an automated solution.

### Audit Readiness

Detailed logs simplify regulatory reviews, reducing audit time and effort.

# Why Partner with Aujas?

## Global Expertise

With operations in North America, EMEA, and Asia Pacific, Aujas offers cutting-edge cybersecurity solutions. Our team of 1,000 cybersecurity engineers across 23 countries brings deep expertise in:

- Application Security
- Risk, Compliance, and Data Protection
- Managed Detection and Response
- Identity and Access Management

## A Strategic Investment

For banking and financial institutions, code signing is more than just a compliance measure—it's a holistic approach to safeguarding system integrity, enhancing customer trust, and driving operational excellence in a highly regulated industry. With CodeSign, you can ensure regulatory compliance, protect your institution from emerging threats, and create a secure foundation for trustworthy operations. Contact us today for a consultation.

## About Aujas Cybersecurity

**Aujas Cybersecurity - A NuSummit Company**, helps build and transform cybersecurity postures to enable businesses to mitigate risks. We are a pure-play cybersecurity services company with deep expertise in Identity and Access Management, Risk Advisory, Security Verification, Managed Detection and Response, and Security Engineering services. Our unique products and services help businesses build and transform security postures while mitigating risks. Our focus is to strengthen security resilience by minimizing the occurrence of attacks, threats, and risks so that you can drive change, innovate, and accelerate growth.
